Faction Errata & Updates

Firstly, thank you for investing in and playing Dropzone Commander 3rd Edition. The rulebook went to print earlier, and we have since spotted some issues that need addressing. Mostly, these cover obscure interactions and clarifications. The digital rules already incorporate these changes. We've also compiled a list of FAQs from the Community at the end of this document. Thank you for your understanding. Enjoy the game!

Every change or question that is new to that edition of the rules will be marked in blue.

Previous changes will be marked in green
