

Bioficer Special Rules

Bioficer Unit Special Rules

Collector X

This Unit may hold up to X RM Tokens (see other Bioficer special rules).

Genitor X

Bioficer Units with a hollow green square Transport Symbol (e.g. ) are Genitor Units.

Genitor Units may begin the game with up to X Raw Materials (RM) tokens aboard them, and they may begin empty—X is shown within their Transport Symbol.

When building your Army, RM tokens cost 5pts each and are assigned to those Genitor Units. Their points contribute to their Group's total cost but do not contribute towards any category. In game, RM tokens are worth 0pts, so they do not contribute to KPs etc.

Genitor Units may never have more than X RM tokens aboard—any above X are discarded.

Genitor Units may not spend more than X RM tokens per activation (see Generated).

RM Tokens may be passed between Genitor and Collector Units within 5" of each other during either Unit's activation. Genitor Units cannot pass RM Tokens to Collectors.

When Genitor Units could normally Disembark a Squad, they may Spawn a Squad of Generated Units. This new Squad must be within its Squad size limits. It Disembarks in the usual way and joins the Genitor Unit's Group. Genitor Units may Spawn multiple Squads per Round.

A Genitor Unit inside a Zone may Spawn Squads at the beginning of its activation.

A Genitor Unit may not Spawn a Squad in the same Round as Embarking any Units.

Generated X

Units of the category Generated are Generated Units. These have a solid green square Transport Symbol with thier RM cost X shown within it (e.g. ). These cannot be taken when building your Army.

Generated Units may be Spawned by Genitor Units during the game. A Generated Unit costs X RM tokens to Spawn—remove those from the Genitor Unit as they Disembark. This is done by Unit—two Genitors with 3RM tokens each could not Spawn a Unit which costs 6RM.

Bioficer Special Rules

Any number of Generated Squads, even if they are Living Weapons, may Embark into any Genitor Unit/s and may do so in either's activation. Embark/Disembark limits are ignored for this. When a Squad does, remove it from the game and place X RM tokens for each Embarking Unit aboard those Genitor Unit/s, or half X for Units with half or fewer of their DP remaining. Any Objects a Unit was carrying are passed to that Genitor Unit, even if it's an Aircraft.

Generated Units are worth 5pts multiplied by X in game—shown with a red icon  with thier points cost on their stats sheet.

Advanced Genitor/ Generated

Generated Units with a gold border on their Transport Symbol (e.g. ) may only be Spawned by a Genitor Unit with a gold number in its Transport Symbol. Advanced Genitors may Spawn non-advanced Generated Units.

Advanced Generated Units may Embark into any Genitor as normal.

Grubsinger

Grubs Occupying the same Zone as one or more Units with this rule gain +1OF and +1DF.

Puppet

If this Unit is not within control range of a friendly Puppeteer, its OF becomes 1, its DF becomes 6+, its Mv becomes 0", and it may not attack—these cannot be modified. Any special rules it has, besides Living Weapons, UC, and Puppet, cease to take effect. A player with only Puppet Occupiers out of control range may only Contest that Zone.

You may not intentionally move Puppet Units out of control range.

Puppeteer X"

This Unit controls friendly Puppet Units within X" of it, including Occupiers, and Occupiers in the same Zone. Any non-Infantry Unit containing a Bioficer Commander gains Puppeteer 9".

Bioficer Special Rules

Bioficer Weapon Special Rules

Decon

Whenever an enemy Unit is destroyed in the same activation as being hit by a friendly Decon Weapon, you may place RM Tokens on 1 Genitor or Collector Unit within 15" of that Unit. If it had 1-2 initial DP, or was an Infantry Unit, place 2 tokens. Otherwise, place 4 tokens.

At the end of step 8 of a CQB, if any of your involved Units had Decon Weapons at the start of this CQB, place 2 RM tokens per enemy Infantry Unit destroyed. You cannot do this more times than you had involved Units with Decon Weapons (e.g. if you had 2 Units with Decon Weapons involved, and 3 enemy Units were destroyed, you may place up to 4 tokens).

Beta

18

Type	Mv	A	DP	Special
Vehicle	6"	2	15	Puppeteer 12", Resilient, UC

Name	Arc	MA	R	Att	Ac	E	Special
 Acid Vomit	F/S/R	Full	6"	8	3+	S6	Assault, Flame
 Rend	F/S/R	Full	CC	5	2+	7	Assault, Demo 0, Strafe

The Beta is a towering, dreaded monstrosity of spawned pseudo-flesh, muscle, and bone. It is the largest horror the Bioficers can spawn on the battlefield. Its many long limbs and razor-edged appendages can rend a super heavy tank to tatters in seconds, and it can vomit acid to reduce infantry to steaming puddles. Also, a Beta can take a phenomenal amount of punishment—it must be pummelled into shattered pulp before it stops fighting. Enhancing and directing this nightmare is an onboard, high-level Intelligence, lending the thing a malevolent consciousness. They take evident pleasure in inflicting huge devastation while directing hordes of lesser bio-constructs.

Drake

6

Type	Mv	A	DP	Special
Aircraft (30mm)	12"	1	4	Puppet, UC, Evl

Name	Arc	MA	R	Att	Ac	E	Special
 Decon Stave (Drake 1)	F/S	Full	24"	1	3+	5	Decon, Precision 2
 Rotary Scythe (Drake 2)	F/S	Full	∞	7	2+	S3	Ignores Cover, T1
 Ghost Circuit, wide (Drake 3)	F/S	Full	12"	2	2+	S1	Alt 1, Decon, Flame
 Ghost Circuit, narrow (Drake 3)	F/S	Full	12"	1	2+	5	Alt 1, Decon, Pen 6+
 Dive and Stab	F/S	Full	CC	D3	3+	4	AA-S, Assault, Ineffective: Zones

Drakes are among the largest airborne bio-horrors yet encountered. With huge, leathery wings, these nightmares strafe the battlefield with a selection of ranged weapons melded into their tails. Also, and more deadly, they can dive and plunge their scythe-like limbs into unsuspecting armoured targets or spear aircraft from the sky.

Drones

4

Type	Mv	OF	DF	B	DP	Special
Infantry	2"	4	4+	A	5	Puppet

Name	Arc	MA	R	Att	Ac	E	Special
 Decon Rifles	F/S/R	Full	18"	5	3+	S1	Decon

Drones are standard Bioficer infantry, and that alone highlights the threat. They are humanoid, rangy, skinless, seven feet tall barefoot, and almost pure muscle, bone, and sinew. They feel no pain, no emotion, and are generated from raw atoms in moments. Their Decon Rifles turn melon-sized chunks of flesh to lukewarm molecular smoke in microseconds, but they are quite capable of tearing limbs off with their bare hands. Their only other piece of equipment is their control headset, through which an Intelligence directs regimented squads to battle. Without this, a Drone is a rotting statue incapable of basic thought.

Epsilon

3, 6

Type	Mv	OF	DF	B	DP	Special
Infantry	2"	1	3+	2+	3	Delayed, Grubsinger, Puppeteer 1"

The Epsilon is the lowest level Intelligence encountered on battlefields so far. Little more than a floating bio-printer, an Epsilon is no threat by itself. However, it uses its tiny Genitor system to spawn swarms of Grubs from harvested biomatter. Too small to be spawned with control head-sets, Grubs are barely perceptive, hideous little mouths on legs imbued with just enough instinct to seek prey and bite. The Epsilon emits waves of ultrasound to stimulate seething masses of Grubs into the enemy, increasing their lethality and cohesion like a dark pied piper. Together, hordes of grubs can envelop, bring down, and flense a victim to bloody scraps.

12

Type	Mv	A	DP	Special				
Aircraft (30mm)	12"	1	4	Ev3, Puppeteer 8", Scout, UC				
Name		Arc	MA	R	Att	Ac	E	Special
 Decon Stave (Gamma 1)	F/S		Full	24"	1	3+	5	Decon
 Rotary Scythe (Gamma 2)	F/S		Full	∞	7	2+	S3	Ignores Cover, T1
 Ghost Circuit, wide (Gamma 3)	F/S		Full	12"	2	2+	S1	Alt 1, Decon, Flame
 Ghost Circuit, narrow (Gamma 3)	F/S		Full	12"	1	2+	5	Alt 1, Decon, Pen 6+
 Dive and Pierce	F/S		Full	CC	3	3+	4	AA-S, Assault, Ineffective: Zones

Drakes are remotely controlled, but a more deadly, sentient evolution exists: the Gamma. This mounts a complex control harness, incorporating a mid-level, fiendish battlefield Intelligence. This lends the Gamma conscious life, increased combat effectiveness, awareness, and the ability to puppeteer more basic generated assets.

Grubs

1

Type	Mv	DF	DF	B	DP	Special
Infantry	2"	2	6+	A	2	Living Weapons

Gun Hand

8

Type	Mv	A	DP	Special				
Vehicle	4"	2	6	Puppet, Resilient, UC				
Name		Arc	MA	R	Att	Ac	E	Special
	Decon Cannon (Gun Hand 1)	F	2"	24"	1	3+	7	Decon, Precision 1
	Winnow Web (Gun Hand 2)	F	2"	15"	8	4+	2	AA, Decon, Strafe, T1
	Quake Howitzer (Gun Hand 3)	F	2"	18"/6"	3	5+	6	Demo 1, Indirect
	Stomp	F/S/R	Full	CC	1	3+	6	Assault, Demo 0

Using the basic platform of a Hand, these are spawned when the Bioficers need additional heavy fire support. They require considerably more resource to spawn, given the percentage of mechanical elements involved. A rotating turret and gun mount is permanently melded into its flesh, supporting a battle tank grade main gun. Although just as combat effective as true vehicle versions, even these elements are designed to be temporary and absorbed post-battle, incorporating just enough solidity and service life to lay waste to the enemy before burning out.

Hand

5

Type	Mv	A	DP	Special
Vehicle	6"	2	6	Puppet, UC, Resilient

Name	Arc	MA	R	Att	Ac	E	Special	
	Crush	F/S/R	Full	CC	1	2+	8	Assault, Concussion, Demo 1

A Hand is a tank-sized, headless, four-limbed monstrosity of pure bone, muscle, and sinew, simpler and less resource-intensive to spawn than bio-constructs with more mechanical elements. Each limb has multiple, rudimentary eyes, and moves with disturbing, unnatural purpose, remotely guided by its control node. Hands are infamous for absorbing horrendous injury as they clamber, quickly, towards their prey. Once there, they grip, crush, and tear armoured vehicles to pieces as if they were paper. Effective and shockingly basic in their approach, they epitomise the callous disposability of flesh to the Bioficers.

Hulk Blades

6

Type	Mv	OF	DF	B	DP	Special
Infantry	2"	4	3+	A	3	Breachers D3, Hardy 4+, Lethal, Puppet, Strong

Name	Arc	MA	R	Att	Ac	E	Special
 Decon Blades	F/S/R	Full	CC	3	2+	6	Assault, Decon

Sharing the same, formidable build of standard Hulks, these less common variants carry only a four-foot Decon Blade. They lack the finesse of thinking swordsmen, but they fight on relentlessly and unfeelingly despite any injury. Wielded with their formidable strength and inhuman speed, Decon Blades can slice effortlessly through the heaviest armour, reducing a foot-wide band of matter to atomic smoke as it passes. They have been known to lop turrets off tanks, but against a living target, the effect is excessive. They also use these blades to penetrate concrete walls, getting them into combat inside any building.

Hulks

6

Type	Mv	DF	DF	B	DP	Special	
Infantry	2"	2	3+	A	3	Hardy 4+, Puppet, Strong	

Name		Arc	MA	R	Att	Ac	E	Special
	Winnow Carbines	F/S/R	Full	9"	6	4+	2	AA, Assault, Decon

Hulks are slightly taller, bulked-out variants of standard Drones. Almost entirely muscle, bone, and sinew, a Hulk can rip a fully armoured human in half. Their primary purpose though is to lug heavy weaponry. Their short-ranged Winnow Carbines can unleash coruscating bursts of uncontrolled decon energies, reducing a target to random chunks of metal and gushing flesh. Contrary to their appearance, Hulks can move with inhuman speed and mechanical precision from the moment they step out of a Genitor unit, making them an instant threat to unfortunate aircraft and infantry.

Spitters

4

Type	Mv	DF	DF	B	DP	Special	
Infantry	2"	2	6+	A	3	Puppet, Strong	

Name		Arc	MA	R	Att	Ac	E	Special
	Acid Jet	F/S/R	Full	3"	5	4+	S4	Flame

Spitters are walking, spider-like, bloated parcels of volatile chemicals. They aren't hard to kill, but that matters little to the Bioficers. Part of their 'head' is a thin proboscis lined with peristaltic muscle. Once in position, the whole monstrosity spasms, belching a spray of reacting compounds through windows or directly into victims. The concoction corrodes, outgasses, and chemically reacts, turning the air itself into an unburning furnace. This eats away at the heaviest infantry armour, weakening it for other horrors to rend apart or ultimately penetrating then liquifying the flesh inside.
